- Microsoft Partner Network

As a Cloud Integrator, Obsidian can provide an objective point of view and recommend the solution that best meets the business, mission and security requirements of our clients. We provide clients with expertise to architect, implement, and manage cloud solutions

Cloud Migration Strategies:

Obsidian offers expertise, including Amazon Certified Solution Architects, to migrate clients from legacy systems to cloud services. We help clients clearly define unique workloads, and recommend the most appropriate cloud solution. We develop comprehensive migration strategies that modernize legacy applications, securely transfer data, and implement workloads in the cloud. Our migration services include:

Cloud Broker:

Obsidian works with clients to understand business processes, provisioning needs, data management, and budgeting to identify cloud providers that are the best match. We manage the use, performance and delivery of cloud services and negotiate relationships between cloud providers and our clients

Cloud Service Management (CSM):

Business Support Services:

- We evaluate cloud services on behalf of our clients and develop price comparisons
- We manage service contracts
- Obsidian provides a single point-of-contact for resolving incidents
- We monitor user operations and generate reports

Provisioning & Configuration Support Services:

- We provision cloud systems based on client solutions
- Obsidian monitors cloud resources for usage, events and alerts and produces performance reports
- We monitor and enforce SLAs for client solutions
